

The Birchwood Cottage is designed for independent living. Just because you need a little assistance doesn't mean you have to give up who you are. This plan offers two different kitchen options based on your unique needs. The standard plan delivers a peninsula with a cooktop that provides a level of separation between the kitchen and main living space. It also makes smart use of the space by providing a convenient clothes washer/dryer combo. Optional Plan A opens up the kitchen to all of the living space. A covered porch provides dry and shaded access to the front door which offers virtually no threshold making access a breeze. Our FlexAssist™ Bathroom can be provided as either a wet or dry bathroom making it completely functional no matter what your needs are!

## Plan Details
