

The Fox Dell Suite is the ideal addition. Its design is perfect to live together with the family as needed, but to be apart when wanted. The features in this plan are a great complement to many of today's homes. The separate living room is enhanced by a built-in Butler's Pantry (small kitchenette). A spacious bedroom affords privacy from both the main home and the living area of the suite. Included is the dry version of our FlexAssist™ Bathroom as standard. The smart use of the space allows a linen closet to be included within the bathroom. With multiple roof designs available, the Fox Dell can become the perfect add-on suite for a two-story or a ranch-style home.
