

The Chestnut Suite is designed with flexibility in mind. This plan is offered as both an attached suite and a cottage which allows you to choose the best fit for you and your property. We have plus-sized our standard FlexAssist™ Bathroom allowing the inclusion of a large linen closet for additional storage. The standard kitchen is easily accessible in this open floor plan. The private bedroom is conveniently accessible from the large common area. Oversized windows and a sliding door provide lights of light and brings the outdoors inside. With lots of flexibility, we can modify the plan to work as an addition to virtually any existing home. Our FlexAssist™ Bathroom can be provided as either a wet or dry bathroom making it completely functional no matter what your needs are!
